

I-40

Between the Arizona State Line (east)
and Needles (west)

Note:
The section of green route separate
from the red route here is not a proven
alignment, but is consistent with similar
instances of the early US 66 pathway.

Note on Alignments:

The original and first paved route continue along the former
NOTR pathway.

The 1950s upgrade 2-lane (orange), was adopted by eastbound
I-40 in the 1960s.

Remains of
a low-water
crossing.

Note:

The green/red route in this area
features numerous examples of
concrete erosion control curbs
along the edge of the roadway.
