

Alignments on this Map:

Green/Red: The original and first paved route.

Orange: The upgrade 4-lane alignment was completed in this area in 1958, following the pathway of future I-44. It was upgraded to interstate standards in the mid-1960s east of Villa Ridge and by 1973 west of Villa Ridge, according to Missouri state highway maps.

Note:
The dashed green line below shows as a scar on a 1945 aerial photo. It may or may not have been US 66 prior to paving.
