

Between Winslow (east)
and Flagstaff (west)

Note:
Culverts on this map
were built in 1950 for the
orange route.

Note on Alignments:

Entering the map on the right, the green/red route follows the path of eastbound I-40, then meanders with the lay of the land. This alignment was straightened out in the early 1950s with the orange 2-lane upgrade route, which was later adopted by the eastbound half of the interstate circa 1970.
