

Between Sullivan (east)
and St. James (west)

Alignments on this Map

Green/Red: The original and first paved route.
Orange: The westbound half of the 4-lane, established in the 1950s. The green/red route made up the eastbound half until the late 1960s, when eastbound lanes for I-44 were added alongside the orange route. At that time, the original route reverted to two-way traffic.
