

ROUTE 66

WILLIAMS

Alignments on this Map

Green: Original route prior to paving. Note: Part of the green route may have been paved while US 66.

Red: First paved alignment, circa 1932.

Orange: 1950s revision to the red route. The streets in Williams became one-way in 1957, following completion of the RR overhead.

Note: Williams was the last city on the route to be bypassed by I-40, holding out through litigation until 1984. East and west of there, the interstate had been completed since the 1960s.

A 1954 aerial photograph shows the RR underpass for US 66 (red) prior to its replacement with the orange route overhead.

The short span on the green route likely predates US 66. Concrete guardrails that curve outward on the ends make it unique.
