

Between Ludlow (east)  
and Barstow (west)

Note on Alignments:

The path of the original route entering Daggett (dashed green line) can be seen on a 1952 aerial photo. It was bypassed by the red route on the south side of the RR in 1931.

Note on bridges: This map features the final two timber bridges built in the Mojave from 1929-1931 for the first uniformly paved route. Some of them were damaged by flooding in the 2000s, resulting in closings and replacements.
