

Between Lebanon (east)  
and Marshfield (west)

Alignments on this Map

Green/Red: Original and first paved route. Note the old surviving culvert on the green route prior to paving.

Orange: 4-lane upgrade US 66 completed in the mid-1950s. Note that aerial images from 1976 show direct access to the 4-lane still in evidence, indicating that it had not yet been brought up to full interstate standards for I-44.
