

ANTERAS

Note on Alignments:

From this point to Kingman (Map 72), the green route is presumed to have followed the path of the National Old Trails Road, which was closer to the RR tracks. This alignment for US 66 is probable but unproven.

Note:
All drainage structures on this map are culverts built in 1936 as the red route was being paved.

Between Hackberry (east)
and Kingman (west)
