Holy  
Moses  
Wash

1939  
Bridge

Alignments on this Map

Green/Red: Original and first paved route. The green alignment along the path of the NOTR was likely paved prior to its bypass by the red route, based on the 1939 build date for Holy Moses Wash Bridge (inset) and the 1940 culvert near downtown. Moving the route to the other side of the RR tracks (red) eliminated two grade crossings.

Orange: The curve correction (upper right) dates to the mid-1940s. Below (inset) involves a slight realignment of the red route necessary to make way for the eastbound half of I-40.
