

Between El Reno (east)
and Bridgeport (west)

Alignments on this Map

Green: There are two alignments of the unpaved route at Calumet. The original path followed Todd St. and Red Rock Rd. In 1931, the route was realigned from Calumet to Geary (Map 80), and the US 270 designation was added. This route was graveled and oiled when constructed, but not paved until after US 66 was moved to the 1933 alignment (previous map).

Red: 1931 alignment, which was paved in 1932 as far as Todd St. in Calumet.
