

Between El Reno (east)  
and Bridgeport (west)

Green: There are two alignments of the unpaved route on this map, though one of them was "improved." The original path followed Memorial Rd. In 1931, the route was realigned and US 270 was added. This route was graveled, drained (culverts), and oiled when constructed, but not paved until after US 66 was moved to the 1933 alignment (Map 76).

Note: All of the drainage structures on this map are culverts.
