

Between El Reno (east)
and Bridgeport (west)

Alignments on this Map

Green: There are two alignments of the unpaved route on this map, though one of them was "improved." The original path followed Memorial Rd. and Karns Rd. In 1931, the route was realigned and US 270 was added. This route was graveled, drained (culverts), and oiled when constructed, but not paved until after US 66 was moved to the 1933 alignment (Map 76).
